- **Fast-acting and non-addictive**
- **Convenient and easy to use**
- **Patented, proprietary form of phototherapy**
- **No drugs, chemicals or stimulants**

Contains (1) IceWave sleeve with 30 patches.

## **Pain Management With No Drugs or Chemicals**

Chronic pain, alone, affects 1.5 billion people around the world, leading to billions of dollars in health care costs and lost work productivity each year.<sup>1</sup> When used as part of a healthy lifestyle, IceWave is a safe, powerful and affordable solution with no drugs, chemicals or stimulants. IceWave is specifically designed to provide relief at the source of discomfort. If you have knee pain, for instance, you can place the patches around that area for quick relief. If you have pain throughout your body, there are different placement options that produce equally effective results (Usage Tab for easy instructions). With its non-drug, non-addictive approach, IceWave truly stands apart from other pain management products on the market today. By reflecting particular wavelengths of light, IceWave patches stimulate specific points on the skin that signal the body to help manage pain.

## **IceWave Study Results**

In 2013, one of the leading pain management experts in France (Dr. Pierre Volckmann), conducted a double-blind placebo controlled study in five French hospitals. A staggering 94 percent of the 100 study participants experienced pain relief within minutes of use. According to Dr. Volckmann: "The safety and efficacy results obtained in this study show that IceWave patches could be a very interesting approach to pain control, without any secondary effects, allowing immediate and durable pain improvement."
